1. Safety Instructions

Please read the instruction carefully which includes important information about the installation, usage and maintenance.

WARNING

Please keep this User Guide for future consultation. If you sell the unit to another user, be sure that they also receive this instruction manual.

Important:

Damages caused by the disregard of this user manual are not subject to warranty. The dealer will not accept liability for any resulting defects or problems.

- Unpack and check carefully that there is no transportation damage before using the unit.
- This product is for indoor use only. Use only in a dry location.
- DO install and operate by qualified operator.
- DO NOT allow children to operate the fixture.
- Use safety chain when fixing the unit. Handle the unit by carrying its base instead of head only.
- The unit must be installed in a location with adequate ventilation, at least 50cm from adjacent surfaces.
- Be sure that no ventilation slots are blocked, otherwise the unit will be overheated.
- Before operating, ensure that the voltage and frequency of power supply match the power requirements of the unit.
- It's important to ground the yellow/green conductor to earth in order to avoid electric shock.
- Minimum ambient temperature TA: 0° C. Maximum ambient temperature TA: 40° C.
- DO NOT connect the device to any dimmer pack.
- Make sure there are no flammable materials close to the unit while operating to avoid fire hazard.
- Examine the power wires carefully; replace them immediately if there is any damage.
- Unit's surface temperature may reach up to 60°C. DO NOT touch the housing bare-handed during its operation.
- Avoid any inflammable liquids, water or metal objects entering the unit. Once it happens, cut

off the mains power immediately.

- DO NOT operate in dirty or dusty environment, do clean fixtures regularly.
- DO NOT touch any wire during operation as there might be a hazard of electric shock.
- Avoid power wires together twist other cables.
- The minimum distance between light output and the illuminated surface must be more than
 0.5 meters.
- Disconnect mains power before fuse replacement or servicing.
- Replace fuse only with the same type.
- In the event of serious operating problem, stop using the unit immediately.
- Never turn on and off the unit time after time.
- The housing, the lenses, or the ultraviolet filter must be replaced if they are visibly damaged.
- DO NOT open the unit as there are no user serviceable parts inside.
- Never try to repair the unit by yourself. Repairs carried out by unskilled people can lead to damage or malfunction. Please contact the nearest authorized technical assistance center if needed.
- Disconnect the mains power if the fixture is has not been used for a long time.
- DO use the original packing materials before transporting it again.
- DO NOT look directly at the light while the LED is on.
- DO NOT start on the unit without LED enclosure or when housing is damaged.

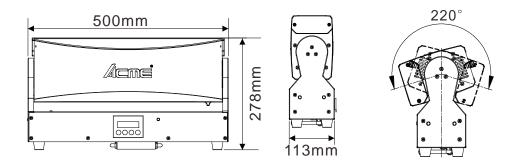

Installation:

The fixture should be mounted via its Omega Quick Release Clamp bracket. Always ensure that the unit is firmly fixed to avoid vibration and slipping while operating and make sure that the structure to which you are attaching the unit is secure and is able to support a weight of 10 times of the fixtures weight. Always use a safety cable that can hold 12 times of the weight of the fixture when installing.

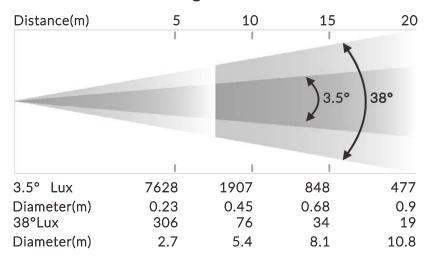

The equipment must be installed by professionals. It must be installed in a place where is out of the reach of people and no one can pass by or under it.

2. Technical Specifications

Power Voltage:
AC 100~240V, 50/60Hz
Power Consumption:
240W
Light Source:
6x40W RGBW LED
Zoom Range:
3.5°~38°
Movement:
Tilt: 220°
Dimmer/Shutter:
0~100% smooth dimming, adjustable strobe speeds
Control:
DMX Channel: 32/14 Channels
Control Mode: DMX512, RDM, Art-Net
Firmware Upgrade: Update via DMX link
Construction:
Display: OLED display
Data In/Out: 3-pin or 5-pin XLR, RJ-45
Power In/Out: Power Connector in/out
Protection Rating: IP20
Features:
The led pitch is the same between 2 fixtures once connected with shafts
Linear motorized zoom
Outstanding color mixing effect
Dimension/Weight:
500x113x278mm, 10.7kgs
19.7"x4.4"x10.9"in, 23.6lbs

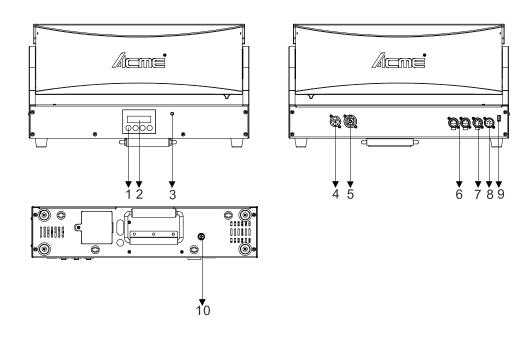

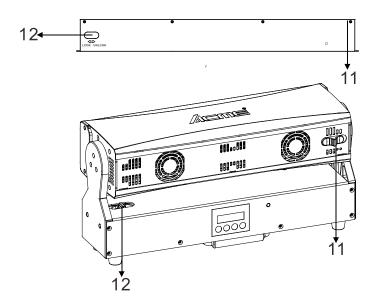

Photometrics Diagram

3. How To Set The Unit

3.1 Control Panel

1. Button:

MENU	To select the programming functions
▲ UP	To go backward in the selected functions
▼ DOWN	To go forward in the selected functions
ENTER To confirm the selected functions	

2. Display: To show the various menus and the selected functions

3. OFFLINE SETTING: To show the battery status

4. POWER IN:

To connect to the mains supply

5. POWER OUT:

To connect to the next unit

6. ETHERNET:

Transfers fixture's information to a main controller

7. DMX OUT:

For DMX512 operation, use 5-pin XLR cable to output DMX signal (3-pin XLR is optional)

8. DMX IN:

For DMX512 operation, use 5-pin XLR cable to input DMX signal (3-pin XLR is optional)

9. Firmware Upgrade

Used to upgrade fixture's firmware

10. FUSE(T 5A):

Protect the unit from damage of the overcurrent

11. PUSH BUTTON 1 (Head Push Button):

Before the fixture is powered on, please push the button to "UNLOCK" of the head

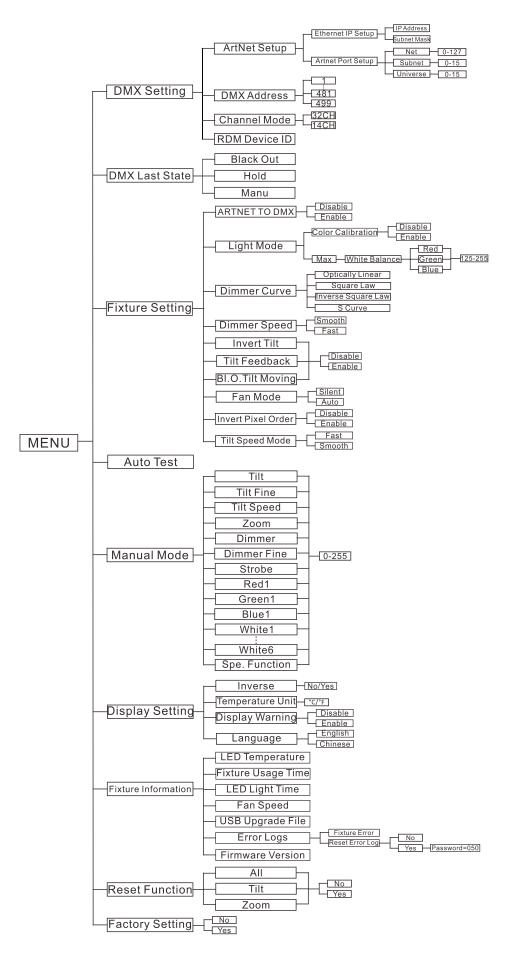

12. PUSH BOTTON 2:

When the fixture is online, please push the button to "LOCK"

3.2 Main Functions

Turn on the unit, press the MENU button into menu mode, and press the UP/DOWN button until the required function is shown on the monitor. Select the function by the ENTER button. Use the UP/DOWN button to choose the submenu, press the ENTER button to store and automatically return to the last menu. Press the MENU button or let the unit idle 30 seconds to exit menu mode. The screen will be automatically locked if there is no operation for a long time, and can be unlocked by long-pressing the MENU button.

The main functions are shown below:

DMX Setting

To select **DMX Setting**, press the **ENTER** button to confirm, use the **UP/DOWN** button to select **ArtNet Setup**, **DMX Address**, **Channel Mode** or **RDM Device ID**.

ArtNet Setup

To select **ArtNet Setup**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Ethernet IP Setup** or **ArtNet Port Setup**, press the **ENTER** button to store. When choose **Ethernet IP Setup**, use the **UP/DOWN** button to select **IP Address** or **Subnet Mask**. When choose **Art-Net Port Setup**, use the **UP/DOWN** button to select **Net**, **Subnet** or **Universe**. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

DMX Address

To select **DMX Address**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to adjust the address from **001** to **481/499**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Channel Mode

To select **Channel Mode**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **32 CH** or **14 CH**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

RDM Device ID

To select **RDM Device ID**, press the **ENTER** button to confirm, it will show the RDM Device ID. To go back to the functions without any changes press the **MENU** button.

DMX Last State

To select **DMX Last State**, press the **ENTER** button to confirm. Use the **DOWN/UP** buttons to select **Black Out**, **Hold** or **Manu**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Fixture Setting

To select Fixture Setting, press the ENTER button to confirm. Use the DOWN/UP buttons to select Artnet to DMX, Light Mode, Dimmer Curve, Dimmer Speed, Invert Tilt, Tilt Feedback, Bl.O. Tilt Moving, Fan Mode, Invert Pixel Order or Tilt Speed Mode.

Artnet to DMX

To select **Artnet to DMX**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Disable** or **Enable**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

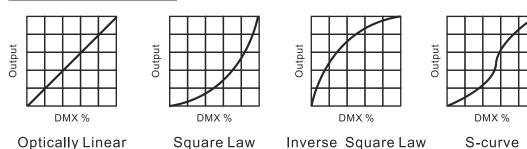

Light Mode

To select **Light Mode**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Color Calibration** or **Max**, press the **ENTER** button to store. When choose **Color Calibration**, use the **UP/DOWN** button to select **Disable** or **Enable**. When choose **Max**, press the **ENTER** button to enter **White Balance**, press the **ENTER** button to confirm, use the **UP/DOWN** button to select **Red**, **Green** or **Blue**, press the **ENTER** button to confirm, use the **UP/DOWN** button to adjust the value from **125** to **255**. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Dimmer Curve

To select **Dimmer Curve**, press the **ENTER** button to confirm. Use the **DOWN/UP** button to select the **Optically Linear**, **Square Law**, **Inverse Square Law** or **S-Curve**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Dimmer Modes

Optically Linear: The increase in light intensity appears to be linear as DMX value is increased.

Square Law: Light intensity control is finer at low levels and coarser at high levels.

Inverse Square Law: Light intensity control is coarser at low levels and finger at high levels.

S-Curve: Light intensity control is finger at low levels and high levels and coarser at medium levels.

Dimmer Speed

To select **Dimmer Speed**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Smooth** or **Fast**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Invert Tilt

To select **Invert Tilt**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Disable** or **Enable**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Tilt Feedback

To select **Tilt Feedback**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Disable** or **Enable**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Bl.O. Tilt Moving

To select **BI.O. Tilt Moving**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Disable** or **Enable**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Fan Mode

To select **Fan Mode**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Auto** or **Silent**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Invert Pixel Order

To select **Invert Pixel Order**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Disable** or **Enable**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Tilt Speed Mode

To select **Tilt Speed Mode**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Fast** or **Smooth**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Auto Test

To select **Auto Test**, press the **ENTER** button to confirm and the unit will run a self-test. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Manual Mode

To select Manual Mode, press the ENTER button to confirm. Use the UP/DOWN button to select Tilt, Tilt Fine, Tilt Speed, Zoom, Dimmer, Dimmer Fine, Strobe, Red1, Green1, Blue1, White1......White6 or Spe. Function. Once the mode has been selected, press the ENTER button to confirm. Use the UP/DOWN buttons to specify a value for the chosen effect from 0 to 255. Press the MENU button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Display Setting

To select **Display Setting**, press the **ENTER** button to confirm, use the **UP/DOWN** button to select **Inverse**, **Temperature Unit**, **Display Warning** or **Language**.

Inverse

To select **Inverse**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **No** or **Yes**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Temperature Unit

To select **Temperature Unit**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **°C** or **°F**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Display Warning

To select **Display Warning**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Disable** or **Enable**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Language

To select **Language**, press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **English** or **Chinese**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Fixture information

To select **Fixture information**, press the **ENTER** button to confirm, use the **UP/DOWN** button to select **LED Temperature**, **Fixture Usage Time**, **LED Light Time**, **Fan Speed**, **USB Upgrade File**, **Error Logs** or **Firmware Version**.

LED Temperature

To select **LED Temperature**, press the **ENTER** button to confirm, LED temperature will show on the display, press the **MENU** button to exit.

Fixture Usage Time

Select **Fixture Usage Time**, press the **ENTER** button to confirm, fixture use time will show on the display, press the **MENU** button to exit.

LED Light Time

Select **LED Light Time**, press the **ENTER** button to confirm, LED use time will show on the display, press the **MENU** button to exit.

Fan Speed

Select **Fan Speed**, press the **ENTER** button to confirm, fan speed will show on the display, press the **MENU** button to exit.

USB Upgrade File

Select **USB Upgrade File**, press the **ENTER** button to confirm, USB upgrade file will show on the display, press the **MENU** button to exit.

Error Logs

Select Error Logs, press the ENTER button to confirm. Use the UP/DOWN button to select Fixture Errors or Reset Error Log, press the ENTER button to store. Select Reset Error Log, press the ENTER button to confirm. Use the UP/DOWN button to select No or Yes, press the ENTER button to store. Select Yes, press the ENTER button to confirm. Use the UP/DOWN button to set the password 050, press the ENTER button to reset error log. Press the MENU button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Firmware Version

Select **Firmware Version**, press the **ENTER** button to confirm, firmware version will show on the display, press the **MENU** button back to exit.

Reset Function

To select **Reset Function**, press the **ENTER** button to confirm, use the **UP/DOWN** button to select **All**, **Tilt** or **Zoom**.

ΑII

Select **All**, press the **ENTER** button to confirm, use the **UP/DOWN** button to select **No** or **Yes** (the unit will run built-in program to reset all motors to their home positions), press **ENTER** button to store. Press the **MENU** button to exit.

Tilt

Select **Tilt**, press the **ENTER** button to confirm, use the **UP/DOWN** button to select **No** or **Yes** (the unit will run built-in program to reset tilt to their home positions), press the **ENTER** button to store. Press the **MENU** button to exit.

Zoom

Select **Zoom**, press the **ENTER** button to confirm, use the **UP/DOWN** button to select **No** or **Yes** (the unit will run built-in program to reset zoom to their home positions), press the **ENTER** button to store. Press the **MENU** button to exit.

Factory Setting

To select **Factory Setting**, press the **ENTER** button to confirm, use the **UP/DOWN** button to select **No** or **Yes**, press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle 30 seconds to exit menu mode.

RDM FUNCTIONS

Select the MANUFACTURER menu to display the manufacturer of the fixture.

Select the SOFTWARE VERSION menu and the program version number of the fixture will be displayed.

Select the DMX START ADDRESS menu to change the DMX 512 address (001-512).

Select the DEVICE MODEL DESCRIPTION menu to display the model of the fixture.

Select the DEVICE LABEL menu to change the model of the fixture.

Select the DMX PERSONALITY menu to set the channel mode of the fixture (32/14 channel).

Select the DMX PERSONALITY DESCRIPTION menu to display the current channel mode of the fixture.

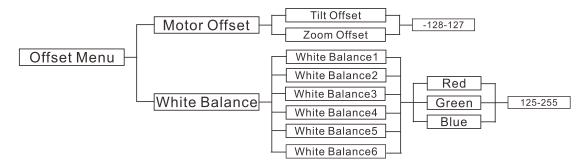

Select the DEVICE HOURS menu to display the running time of the fixture.

Select the TILT INVERT menu and the fixture will run the tilt invert mode.

Select the RESET DEVICE menu, the WARM RESET/COLD RESET option will be displayed. When WARM RESET is selected, the fixture will start a warm reset, and exit when COLD RESET is selected.

3.3 Home Position Adjustment

Press the MENU button into menu mode, then press the ENTER button for about 3 seconds into offset mode to adjust the home position. Select the function by the ENTER button. Use the UP/DOWN button to choose the submenu, press the ENTER button to store and automatically return to the last menu. Press MENU button to exit.

Motor Offset

Enter offset mode, Select **Motor Offset**, press the **ENTER** button to confirm, use the **UP/DOWN** button to select **Tilt Offset** or **Zoom Offset**, press the **ENTER** button to store. Press the **MENU** button to exit.

Tilt Offset

Enter offset mode, Select **Tilt Offset**, press the **ENTER** button to confirm, the present position will blink on the display, use the **UP/DOWN** button to offset the value from -128 to 127, press the **ENTER** button to store. Press the **MENU** button to exit.

Zoom Offset

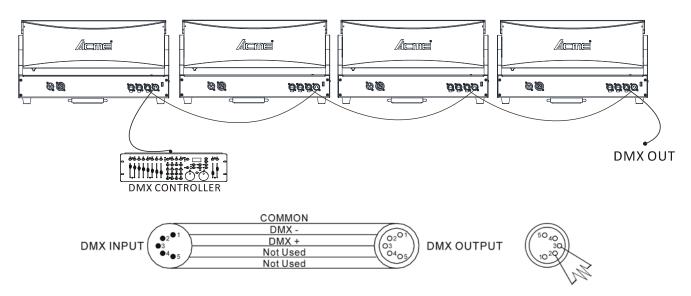

Enter offset mode, Select **Zoom Offset**, press the **ENTER** button to confirm, the present position will blink on the display, use the **UP/DOWN** button to offset the value from -128 to 127, press the **ENTER** button to store. Press the **MENU** button to exit.

White Balance

Enter offset mode, Select White Balance, press the ENTER button to confirm, use the UP/DOWN button to select White Balance1, White Balance2...... or White Balance6, press the ENTER button to confirm, use the UP/DOWN button to select Red, Green or Blue, press the ENTER button to confirm, use the UP/DOWN button to adjust the value from 125 to 255, press the ENTER button to store. Press the MENU button to exit.

4. Control By Universal DMX Controller

4.1 DMX512 Connection

- 1. At last unit, the DMX cable has to be terminated with a terminator. Solder a 120-ohm 1/4W resistor between pin 2(DMX-) and pin 3(DMX+) into a 3-pin XLR-plug and plug it in the DMX-output of the last unit.
- 2. Connect the unit together in a "daisy chain" by XLR plug cable from the output of the unit to the input of the next unit. The cable cannot be branched or split to a "Y" cable. DMX 512 is a very high-speed signal. Inadequate or damaged cables, soldered joints or corroded connectors can easily distort the signal and shut down the system.
- 3. The DMX output and input connectors are pass-through to maintain the DMX circuit, when one of the units' power is disconnected.
- 4. Each lighting unit needs to have a DMX address to receive the data by the controller. The address number is between 1-512.
- 5. The end of the DMX 512 system should be terminated to reduce signal errors.
- 6. 3 pin XLR connectors are more popular than 5 pins XLR.
 - 3 pin XLR: Pin 1: GND, Pin 2: Negative signal (-), Pin 3: Positive signal (+)
 - 5 pin XLR: Pin 1: GND, Pin 2: Negative signal (-), Pin 3: Positive signal (+), Pin4, Pin5 not used.

4.2 Address Setting

If you use a universal DMX controller to control the units, you have to set DMX address from 1 to 512 so that the units can receive DMX signal.

Press the MENU button to enter menu mode, select DMX Settings, press the ENTER button to confirm, use the UP/DOWN button to select DMX Address, press the ENTER button to confirm, the present address will blinking the display, use the UP/DOWN button to adjust the address from 001 to 512, press the ENTER button to store. Press the MENU button back to the last menu or let the unit idle 30 seconds to exit menu mode.

Please refer to the following diagram to address your DMX512 channel for the first 4 units.

Channel mode	Unit 1 Address	Unit 2 Address	Unit 3 Address	Unit 4 Address
32 channels	1	33	65	97
14 channels	1	15	29	43

4.3 DMX512 Configurations

Please refer to below configurations to control the fixtures

Attentions:

- 1. The unit will maintain the last condition until reset if you cut-off the DMX signal.
- 2. For the channel Function, keep the value for about 3 seconds, then the corresponding function will take into effect.

32 Channels (Mode 1):

CHANNEL	VALUE	FUNCTION
1	000-255	Tilt 0°→220°
2	000-255	Tilt Fine
		Tilt Speed
3	000-007	auto speed

5. Troubleshooting

Following are a few common problems that may occur during operation. Here are some suggestions for easy troubleshooting:

A. The unit does not work, no light and the fan does not work

- 1. Check the connect power and main fuse.
- 2. Measure the mains voltage on the main connector.
- 3. Check the power on LED to see if it can be light up or not.

B. Not responding to DMX controller

- 1. Check DMX connectors, cables to see if they are linked properly.
- 2. Check the address settings and DMX polarity.
- 3. If you have intermittent DMX signal problems, check the pins on connectors or on PCB of the unit or the previous one.
- 4. Try to use another DMX controller.
- 5. Check to see if the DMX cables run near or run alongside to high voltage cables that may cause damage or interference to DMX interface circuit.

C. One of the channels is not working well

- 1. The stepper motor might be damaged or the cable connected to the PCB is broken.
- 2. The motor's drive IC on the PCB might be out of condition.

6. Fixture Cleaning

The cleaning of internal and external optical lenses and/or mirrors must be carried out periodically to optimize light output. Cleaning frequency depends on the environment in which the fixture operates: damp, smoky or particularly dirty surrounding can cause greater accumulation of dirt on the unit's optics.

- Clean with soft cloth and use normal glass to clean liquid.
- Always dry the parts carefully.
- Clean the external optics at least every 20 days.

Declaration of Conformity

We declare that our products (lighting equipments) comply with the following specification and bears CE mark in accordance with the provision of the Electromagnetic Compatibility (EMC) Directive 2014/30/EU.

EN 55032: 2015; EN 61000-3-2: 2014; EN 61000-3-3: 2013; EN 55103-2: 2009.
