

VACUUM TESTER

V-BOX

Construction

Display: LCD display

Accessories: An air pump

Four shut off valves

Power Cable

Protection Rating: Waterproof in case of sealed shell.

Control

Firmware Upgrade: Update via USB link

Electrical and Physica

Power Voltage: 100-240V

Power Consumption: Working power 28.5w

Standby power 3w

Lux: 17L/minute

Maximum positive pressure: 80kpa

Maximum negative pressure: -60kpa

Size: 285x355x165mm

Weight: 6.8 KG

Dimensions(mm)

Features

V-BOX is a portable air tightness tester, The test object are Head lamp and non-head lamp. It is a non-destructive testing instrument based on the principle of pressure drop method and using compressed air (or vacuum) as the medium to test products. The utility model has the advantages of simple structure, complete functions and sensitive precision, which can be used only by connecting the power interface and the lamp interface, and can be used as an emergency test equipment to test whether the lamp is waterproof or leaky.
