

DMX SPLITTER II™

CA-DS18 II

CA-DS18 II DMX signal amplifier dedicated to DMX512 digital lighting control signal amplification with smaller power and lighter weight. It's specially designed for connections of DMX receivers (Moving heads, color changers, dimmers, etc.) in a daisy chain configuration. It is suitable to the application that DMX 512 signal have been weakened because of long distance transmission. CA-DS18 will efficiently buffer. And magnify the DMX signal that makes the DMX data transmission more accurate and reliable.

FEATURES

- One DMX in and Eight DMX out
- 3-pin and 5-pin XLR
- Outputs are isolated from each other over 2,000V

ELECTRICAL AND PHYSICAL

- Power Voltage: AC 120V-230V, 50/60Hz
- Power Consumption: 10 W
- Dimension: 1U 19", 483 x 145 x 44 mm (19.0"x5.7"x1.8")
- Weight: 2 Kg (4.4 lbs)
